The Greener Way to do Business

Why we need trees;

- **The human race has simply cut down too many.**
The average European wooded area is 32% per country, whereas it is just 12% in the United Kingdom.
- **Trees absorb Carbon Dioxide and produce Oxygen, therefore renewing our air supply.**
- **Just one mature tree can produce enough Oxygen to supply 10 people per year.**
- **Trees evaporate water, therefore lowering air temperature.**
- **Tree roots stabilise soil and prevent erosion**
- **An estimated 12 trees a year consumed by each person in the UK, and reforestation is not keeping up with consumption.**
- **Each person is responsible for approximately 10 tonnes of Carbon Dioxide each year**
- **One tonne of Carbon Dioxide will fill 230,000 2 litre bottles of carbonated drink**
- **One single tree can absorb the CO₂ from over 170,000 2 litre bottles of carbonated drink**
- **A mature woodland (one hectare) will absorb the carbon emissions of 100 family cars**

The Greener Way to do Business

Did you know 50,000 tonnes of paper are used to produce over 30 million phone directories each year in the UK!

While much of the focus on the environmental practices of companies has focused on large corporations, smaller firms **small companies make up 98 percent of all companies in the UK.**, and therefore have a key role to play in making the UK more energy efficient. Although we may individually be small resource users and waste emitters, together we are a force that can make a difference.

We aim to offer environmentally-minded customers an opportunity to choose a 'greener' supplier for their requirements. We will also suggest ways in which small companies can become more environmentally efficient, and the benefits that can come as a result of going green.

The Green Team UK aim to;

- Provide environmentally-minded customers an opportunity to choose a 'greener' supplier for their requirements.
- Suggest ways in which small companies can become more environmentally efficient, and the benefits that can come as a result of going green.
- An easy to use information guide to 'greener' companies offering products and services.
- To promote interaction between **Green Team Members**, encouraging them to trade with each other, forming a 'Green Team Community'
- To inform and update **Green Team Members** on legislation and targets set by the EU via our eNewsletter, which can be forwarded to their client base, advertising the fact that your company is showing 'corporate social responsibility'.
- To promote and educate companies on ways in which we can all cut back, refine and profit from being greener', via email marketing
